

boost::statechart::
event< EvFail >

```
classDiagram
    class Base["boost::statechart::event< EvFail >"]
    class Derived["sm_viewer_sim::EvFail"]
    Base <|-- Derived
```

The diagram shows two class boxes. The top box, representing the base class, is white with a black border and contains the text 'boost::statechart::' followed by 'event< EvFail >' on the next line. It is divided into three horizontal compartments by thin lines. The bottom compartment is empty. The bottom box, representing the derived class, is gray with a black border and contains the text 'sm_viewer_sim::EvFail' on the top line. It is also divided into three horizontal compartments, with the bottom two being empty. A blue arrow points from the top of the bottom box to the bottom of the top box, indicating an inheritance relationship.

sm_viewer_sim::EvFail
