

boost::statechart::
event< EvKeyPressT<
TSource > >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvKeyPressT< TSource > >"]
    class sm_dance_bot_evKeyPress["sm_dance_bot::EvKeyPressT< TSource >"]
    boost_statechart_event <|-- sm_dance_bot_evKeyPress
```

The diagram illustrates an inheritance relationship between two C++ classes. The base class, `boost::statechart::event< EvKeyPressT< TSource > >`, is shown in a white box with a thin grey border. It has two empty rectangular compartments below the class name. The derived class, `sm_dance_bot::EvKeyPressT< TSource >`, is shown in a grey box with a thick black border. It also has two empty rectangular compartments below the class name. A blue arrow with an open triangular head points from the derived class box to the base class box, indicating that `sm_dance_bot::EvKeyPress` inherits from `boost::statechart::event`.

sm_dance_bot::EvKeyPress
T< TSource >
