

```
boost::statechart::  
event< EvKeyPressI<  
    TSource, TObjecTag > >
```

A UML class diagram showing inheritance. The base class, `boost::statechart::event< EvKeyPressI< TSource, TObjecTag > >`, is represented by a white box with a black border and is divided into three horizontal compartments. The top compartment contains the class name. The derived class, `keyboard_client::EvKeyPressI< TSource, TObjecTag >`, is represented by a gray box with a black border and is also divided into three horizontal compartments. The top compartment contains the class name. A blue arrow with an open triangular head points from the top compartment of the derived class to the top compartment of the base class, indicating inheritance.

```
keyboard_client::EvKeyPress  
I< TSource, TObjecTag >
```
