

```
boost::statechart::  
event< EvWaypoint211  
< TSource, TObjectTag > >
```

The diagram shows two class boxes. The top box, representing `boost::statechart::event< EvWaypoint211 < TSource, TObjectTag > >`, has three horizontal compartments. The bottom compartment is empty. The bottom box, representing `smacc::EvWaypoint211 < TSource, TObjectTag >`, has three horizontal compartments. The top compartment contains the class name and template parameters. The middle compartment contains the public member `+ waypointIndex`. The bottom compartment is empty. A blue arrow with an open triangular head points from the top of the bottom box to the bottom of the top box, indicating inheritance.

```
smacc::EvWaypoint211  
< TSource, TObjectTag >
```

```
+ waypointIndex
```
