

gtk::Window

```
classDiagram
    class gtk_Window["gtk::Window"]
    class smacc_viewer_xdot_xdot_Dot_Window["smacc_viewer.xdot.xdot.Dot Window"]
    smacc_viewer_xdot_xdot_Dot_Window --|> gtk_Window
```

The diagram shows a class hierarchy. At the top is a class box for 'gtk::Window'. Below it is a class box for 'smacc_viewer.xdot.xdot.Dot Window'. A blue arrow with an open triangle head points from the 'smacc_viewer.xdot.xdot.Dot Window' box up to the 'gtk::Window' box, indicating inheritance.

smacc_viewer.xdot.xdot.Dot
