

```
boost::statechart::  
event< EvWaypoint2<  
    TSource > >
```

A UML class diagram illustrating inheritance. The base class, `boost::statechart::event< EvWaypoint2< TSource > >`, is shown in a white box with a gray border and is divided into three horizontal compartments. The top compartment contains the class name, while the middle and bottom compartments are empty. The derived class, `EvWaypoint2< TSource >`, is shown in a gray box with a black border and is also divided into three horizontal compartments. The top compartment contains the class name, while the middle and bottom compartments are empty. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box, indicating an inheritance relationship.

```
EvWaypoint2< TSource >
```
