

```
boost::statechart::  
event< EvWaypoint2<  
    TSource > >
```

A UML class diagram showing inheritance. The base class, `EvWaypoint2< TSource >`, is represented by a gray-shaded box with three horizontal compartments. The top compartment contains the class name. The derived class, `boost::statechart::event< EvWaypoint2< TSource > >`, is represented by a white box with three horizontal compartments. The top compartment contains the class name. A blue arrow with an open triangular head points from the top compartment of the base class to the bottom compartment of the derived class, indicating inheritance.

```
EvWaypoint2< TSource >
```
