

```
boost::statechart::  
event< EvAll< TSource,  
    TObjectTag > >
```

The diagram illustrates an inheritance relationship between two C++ classes. The base class, `boost::statechart::event< EvAll< TSource, TObjectTag > >`, is shown in a white box at the top. The derived class, `smacc::EvAll< TSource, TObjectTag >`, is shown in a gray box at the bottom. A blue arrow with an open triangular head points from the derived class to the base class, indicating that `smacc::EvAll` inherits from `boost::statechart::event`. Both class boxes are divided into three horizontal compartments, with the class name and template parameters occupying the top one.

```
smacc::EvAll< TSource,  
    TObjectTag >
```
