

```
boost::statechart::  
event< EvTopicMessage  
< SensorBehaviorType > >
```

A UML class diagram showing an inheritance relationship. The base class, `boost::statechart::event< EvTopicMessage < SensorBehaviorType > >`, is represented by a white box with a black border. The derived class, `smacc::EvTopicMessage < SensorBehaviorType >`, is represented by a gray box with a black border. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.

```
smacc::EvTopicMessage  
< SensorBehaviorType >
```
