

```
boost::statechart::  
event< EvWaypoint117  
< TSource, TObjectTag > >
```

The diagram shows two class boxes. The top box is for `boost::statechart::event< EvWaypoint117 < TSource, TObjectTag > >` and has two empty compartments below the name. The bottom box is for `smacc::EvWaypoint117 < TSource, TObjectTag >` and contains the member `+ waypointIndex`. A blue arrow with an open triangle head points from the bottom box to the top box, indicating inheritance.

```
smacc::EvWaypoint117  
< TSource, TObjectTag >
```

```
+ waypointIndex
```
