

```
boost::statechart::  
event< EvTopicInitialMessage  
    < TSource, TObjectTag > >
```

A UML class diagram showing inheritance. The base class is `boost::statechart::event< EvTopicInitialMessage < TSource, TObjectTag > >` and the derived class is `smacc::EvTopicInitialMessage < TSource, TObjectTag >`. The derived class has two attributes: `+ msgData` and `+ getEventLabel()`. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.

```
smacc::EvTopicInitialMessage  
    < TSource, TObjectTag >
```

```
+ msgData
```

```
+ getEventLabel()
```
